Jasper High School Helps Elementary Schools in Corporation

Jasper, Indiana- Mr. Jerry Uebelhor's Construction Processes class at Jasper High School wanted to help elementary schools in the Greater Jasper Consolidated School Corporation. They asked the kindergarten teachers at Fifth Street Elementary, Jasper, Indiana, and Ireland Elementary, Ireland, Indiana, what they would like for use with their students. Fifth Street requested picnic tables and Ireland asked for a toy box and a limbo set.

The seventeen students in the class formed into small groups and each group began work on the project. Four picnic tables were designed and built on a small scale so they would be more practical for the size of young students. The limbo sets consisted of two stands with supports at various levels so a long pole could be lowered as the game of limbo progresses. In addition to the larger projects, each high school student crafted several toy cars in various shapes and colors.

After the completion of each of these tasks, the picnic tables were delivered to the outdoor learning area at Fifth Street along with some toy cars. The toy box and two limbo sets were received at Ireland Elementary to the smiles and excitement of many students.
